Hungary's NOG conference
30 September – 1 October 2026, Hungary
www.hunog.hu/en

CALL FOR PRESENTATIONS

The Council of Internet Service Providers (ISZT) and ISZT Nonprofit Ltd., the registrar and operator of .HU domains, announce Hungary's fourth NOG conference.

In the fall of 2025, Hungary's second NOG conference took place with over 280 registered participants from more than 120 companies, featuring presentations by 35 renowned domestic and international experts and supported by 20 sponsors. The event was created with the goal of providing a platform for hundreds of network and systems engineers to share their knowledge.

The next HUNOG will be held in person between 30 September – 1 October, 2026, at the Hotel Ózon & Luxury Villas****superior in Mátraháza.

Participate at HUNOG if you are: an Internet network operator, network builder, Internet service provider, domain registrar, server operator, or simply interested in IT.

The organizers: The Scientific Association of Internet Service Providers (ISZT) is the professional association of internet service providers. The organization, which operates in the form of an association, performs self-regulatory and interest-representation activities. It unites more than 50 internet service providers, from the smallest to the largest. ISZT operates BIX (Budapest Internet Exchange), a providerneutral internet exchange that serves the interest of the whole internet community, and together with SZTAKI, it operates Hun-CERT.

ISZT Nonprofit Ltd., 100% owned by ISZT, is the registrar and manager of domain names belonging to the top-level .HU domain name, and the operator of the related technical infrastructure.

Do you have an interesting topic or idea related to Internet networks? Apply to speak at the first HUNOG in Hungary!

Transform your current topic, interesting idea, or relevant solution in the field of networking into a presentation. Present your research results, attention-grabbing or thought-provoking ideas to the community! Share your knowledge at a workshop, present the best practices achieved at your company!

Preferred topics (not limited to): IPv6, Routing, Peering (RPKI), Network security, AI, Automation, DNS, DNSSEC.

Please submit your talk title, a description of the proposed topic, and a short presenter bio via the form on the Apply to speak page. Presentations are planned to be 20 minutes, in Hungarian or English. The HUNOG Program Committee will provide feedback on the topic proposals soon after having received it.

Presentation guidelines

The HUNOG audience does not favor commercial presentations; therefore, the Program Committee does not allow product marketing content. Based on previous feedback, the most successful presentations focus on sharing operational experiences, presenting research findings, or showcasing case studies. If you wish to introduce a commercial solution, it is recommended to focus on the underlying technology rather than the detailed promotion of the product itself.

If you want to showcase a commercial solution or product, we recommend the X-PERIENCE package!

This opportunity is available exclusively as part of a sponsorship package and includes a dedicated private meeting room as well as a 45-minute technical demo session. The goal of X-PERIENCE is to allow you to present your solution to an audience of experts and decision-makers with complete freedom, without any branding restrictions. Further details about the X-PERIENCE package can be found in the sponsor packages!

Important Notes: The Program Committee reserves the right to review and approve all Tech Demo sessions.

Please note that all presentations at HUNOG will be made publicly available on our website after the conference. If you plan to present sensitive information that you do not wish to be published, please carefully consider the content of your presentation!
